The EB-5 marketplace is heavily concentrated with new and old projects looking to secure an alternative source of financing. With more countries offering unique and competitive immigration programs, the EB-5 program is facing tremendous challenges to raise capital in international market. I have formed this very close-knit organization to ensure that my past clientele base remains connected in the constantly evolving Sino-U.S. business. ***Brian Su's Inner Circle®*** keeps you updated on the ever changing market conditions, emerging EB-5 markets, and the Chinese emigration system; connects you to my powerful and extensive relationships throughout China and the U.S.; and gives you the edge necessary to remain ahead of competitors and on top of the investment market.
